OUR SUSTAINABILITY STRATEGY COVERS THE FOUR P'S

PLANET

We are committed to protecting our planet by minimising our carbon footprint every day.

PRODUCTS

Offering healthy and safe products is our top priority.

PEOPLE

The secret recipe of our sustainability strategy? Our passionate staff.

PARTNERSHIP

We strive for sustainable, long-term relationships with all our stakeholders.

Production sites

DARTA THRIVES ALL OVER EUROPE

Our aim is to bring the harvested crops from the field to the production site as quickly as possible. That is why our sites are strategically located in 5 of Europe's most fertile agricultural regions.

Belgium

Our headquarters in Ardoois is also Darta's main production site. It is located in the heart of Flanders, a region in which no less than 30% of all European frozen vegetables are produced. Here we produce peas, beans, root vegetables, leaf vegetables, cabbages, onions and many other products.

United Kingdom

We built one of the UK's greenest food processing facilities in the historical English county of Yorkshire. This sustainable step forward was made possible thanks to our collaboration with GWE Biogas and Swaythorpe Growers. Darta Yorkshire is known for its delicious Yorkshire peas but also harvests and produces beans and root vegetables.

Portugal

Our Alentejo site specialises in Mediterranean crops such as broccoli, peppers, tomatoes and strawberries. The Portuguese climate allows us to grow beans, peas and courgettes at different times than in the Belgian growing process. This allows us to always guarantee a constant supply of all this delicious produce.

Italy

The Fucino valley in Abruzzo provides the fertile soil for our high-quality 'Made in Italy' products. We grow and process various vegetables and herbs there, ranging from premium spinach to cime di rapa, fennel, basil, parsley and so on.

Sicily

In Sicily, we lovingly harvest our southern vegetables, such as aubergines, courgettes and peppers, in a traditional way. They then go straight from the field into the grill oven and are frozen fresh at our local production site on the same day. High-value products such as artichokes are also grown in this region.

VEGETABLES

A top-down view of various fruit bowls and smoothies on a pink background. In the center is a large bowl filled with a mix of strawberries, raspberries, blueberries, blackberries, and red currants. To the top left is a glass bowl containing a red smoothie, topped with a strawberry and a blackberry. To the bottom left is a bowl of fresh strawberries. To the bottom right is a bowl of white yogurt with a raspberry, a blueberry, and a red currant. A silver spoon rests on the yogurt bowl. The word "FRUIT" is written in white capital letters across the center. The background is a textured pink surface with scattered fruit and crumbs.
